RE: REFFERAL FOR WINSPIRE SOLUTIONS PTE LTD

To Whom It May Concern:

We highly recommend Winspire Solutions Pte Ltd to any company seeking a dedicated and experienced team of ERP system solutions provider. After a review of several experienced service providers in the market, our company decided to engage Winspire Solutions in March 2022 to implement **Microsoft Dynamics 365 Business Central** to manage our growing Retail business.

As early as the System Requirement Study phase, the Project Manager and his team of consultants were able to communicate clearly about the changes that would take place and identified the pain areas that plagued the respective departments. We were able to roll out the project on time and within the allocated budget.

The team could understand our company's requirements and was able to provide solutions. They demonstrated to us how we can leverage the best practices within the ERP system to achieve optimal productivity. With the inception of the system, we brought all the retail store's inventory under a single book. Going forward, with the streamlined warehouse processes coupled with the Delivery Addon, we can plan our delivery routes of our fleets more effectively. In a nutshell, Winspire has exceeded our expectations and delivered above their promises. We look forward to continuing our successful partnership with Winspire Solutions.

Yours faithfully,

Ms Diana Seah

Finance Controller
